Veracruz, México
Manuel Muñoz

Profile

Full Stack Engineer specializing in **React**, **TypeScript**, **Python**, **Django** and **NextJS**. Proven experience building scalable applications with Laravel, and PHP. Skilled in database design (MySQL, MongoDB) and passionate about UX/UI-driven frontend development.

Professional Experience

Full Stack Engineer , <i>Click It Tech</i> Specialized in React and Next.js development to engineer automated, rule-based recruitment workflows and custom ATS modules for a major US-based client. Responsible for systematically refactoring legacy technical debt, optimizing relational queries, and clearing Jira development backlogs ahead of schedule. Promoted into a Senior role within the current year due to technical excellence and successful project delivery.	Jan 2026 – Present Saltillo, Coahuila (Remote)
Full Stack Engineer , <i>Tech Genies</i>  Contributed to a massive system migration from legacy PERL/PHP infrastructures to a modern stack for a <i>US based client</i> . Acted as a key technical advisor for front-end development, establishing best practices in React, Next.js, and TypeScript, while quickly mastering Python and Django to deliver secure backend RESTful APIs and complex invoice processing modules.	May 2023 – Dec 2025 Ciudad de México, México (Remote)
Technical Support , <i>UnikaSoft</i> Managed high-volume user incident pipelines and debugged production software to guarantee application workflow stability. Acted as a key technical bridge between users and the core development team by translating complex, non-technical feedback into actionable bug reports and system specifications.	Oct 2022 – Feb 2023 Xalapa, México
Full Stack Web Developer , <i>Instituto Tecnológico Superior de Xalapa</i>  Proposed and executed a critical architectural pivot from an obsolete, non-functional desktop Java prototype into a modern web application MVP. Designed a scalable relational database and implemented secure authentication modules using Laravel, delivering a functional system framework within a strict 6-month academic deadline.	Sep 2021 – Mar 2022 Xalapa, México
Full Stack Web Developer , <i>Sistemas en Manejo y Administración de Residuos</i>  Co-architected a secure internal web application using Laravel, Blade, and MariaDB to spearhead the digital transformation of a waste management firm. Successfully normalized chaotic spreadsheet data into a relational structure, automating the core administrative workflow and eliminating 100% of redundant manual entries.	Feb 2021 – Aug 2021 Xalapa, México

Education

Computer systems engineering , <i>Instituto Tecnológico Superior de Xalapa</i>  During my time at university, I developed a deep understanding of programming languages and algorithmic thinking, while also acquiring key technical skills in the design and management of relational databases and in the implementation and administration of computer networks.	Aug 2017 – Feb 2022 Xalapa, México
